The revolutionary headgear
for maximum individual comfort

SEE
WHAT YOU
CAN DO

The new optrel IsoFit® headgear. Just fits perfectly.

Outer, **stable**
headgear layer

Inner, **flexible**
headgear layer

Individually adjustable
forehead stabilizer

Individual
height adjustment

Personalized Perfection

Wearing comfort has a positive impact on health and performance of every single worker. That's something optrel customers know for years. The headgear is the central connector between a man and his helmet. That's why the headgear plays the central role in matters of comfort and ergonomics.

Now the optrel engineers have set a new benchmark with the all new IsoFit® headgear. It's the only product worldwide which is adjustable in width, length and height to any form of head - 3-dimensional. That's why we consider it the perfect fit.

What seemed to be impossible is solved by a genius construction, which for the first time at all uses a liner fit system. This connects a two-layer construction with two stabilizers on forehead and backhead.

The inner layer and the stabilizers are equipped with extremely comfortable tricot textile pads. With any turn of the micro-adjustable rotary wheel the inner layer as well as the stabilizers snuggle to the head of the user.

The outer layer at the same time stays absolutely stable and provides perfect positioning even in extreme working positions, what was an unsolved problem with any ergonomic headgear until today.

A never-before seen wearing comfort is the result.

Wide surface, **replaceable comfort pads** with 100% more surface contact providing a perfect weight distribution

Individually adjustable **backhead stabilizer**

Precise adjustable liner fit system for a perfect fit

Quick Release to unfast the headgear in milliseconds

The new optrel IsoFit® headgear. Combinable with every optrel helmet. And to any headsize from S to XL.

The new optrel IsoFit® headgear is combinable with all optrel welding and grinding helmets.

It's adjusted in a few seconds and individually fitted to every headsize from S to XL. By the way it can also be unmounted, be cleaned with soap and warm water and remounted in only a couple of seconds.
